📍 Bengaluru, India 🌐 <http://www.cartoonmango.com/>

- Evaluated project requirements, specifications and developed software applications that surpassed client expectations.
- Worked with project managers, developers, quality assurance and customers to resolve technical issues.

- Discussed project progress with customers, collected feedback on different stages and directly addressed concerns.
- Introduced methodologies and best practices to software development division to enhance product definition and application customization.
- Trained and mentored junior developers and engineers, teaching skills in JavaScript and working to improve overall team performance.

PROJECTS

Atlas

Dec 2019 - Current

<https://atlas.urbanpiper.com/>

Skills acquired: Python Django | ClickHouse | SQLAlchemy | MySQL | GraphQL | RazorPay | Pytest | Github Issues | Time Management | Code Review

- Learned OLAP databases, migrated existing analytics solution from Exasol to ClickHouse DB.
- Ingested MySql data into ClickHouse using Airflow ETL.
- Designed the core architecture of Invoice Processing module. A module to send periodic notifications and collect payments for invoices created in QuickBooks for the merchants.
- Developed periodic tasks with RQ worker to maintain active auth token and to send periodic notifications.
- Developed django management commands to ease up the redundant tasks.
- Integrated Razorpay payment links
- Learned GraphQL and applied it while migrating existing SSR based CRM product to APIs.
- Documented the critical parts of the codebase
- Reviewed pull requests

Portea

Aug 2019 - Aug 2019

<https://www.porteaincontrol.com/>

Skills acquired: Node Express Js | MySQL | Knex | Docker | Gitlab CI/CD | Leadership | Time Management | Code Review | Swagger

- Designed the core architecture of the project.
- Managed a team of 2 developers
- Reviewed pull requests
- Handled code deployment with Docker and Gitlab CI/CD

Medwisor

Dec 2018 - Apr 2019

<https://www.medwisor.com/>

Skills acquired: Node Express Js | MySQL | Sequelize | Bash | Sharp | FFMPEG | Docker | Puppeteer | Headless Chrome | Bitbucket pipeline

- Designed the core architecture of the project.
- Prepared Node.js ES6 boilerplate with Sequelize.
- Developed 3 different portal Patient, Hospital and Admin, Each as a microservice communicating with each other using the HTTP protocol.
- Prepared an image scale utility with Sharp
- Prepared a video scale utility with FFMPEG
- Prepared a pdf converter utility with Puppeteer and Headless Chrome
- Did bitbucket pipeline setup
- goCash payment gateway integration

Cricket.com

Jul 2018 - Dec 2018

<https://www.cricket.com/>

Skills acquired: Node Express Js | MongoDB | Firebase | Mongoose | Redis | Bash | Docker

- Designed the core architecture of the project.
- Developed CRUD APIs for authentication, league, event, match, team, player, articles modules.
- Worked on cronjobs to trigger events when the game status changes.
- Worked on firebase socket for realtime updates and notifications.
- Used Redis for caching scorecard data.
- Used Redis as a message broker between the API server and the Java parser (Parser was responsible for getting data from third parties like cricketapi, opta, etc and storing it to DB and Redis)
- Managed code deployment using Docker.

Machine & Motors

Mar 2017 - Jan 2018

<https://www.machinenmotor.com>

Skills acquired: Python Django | JQuery | MySQL | AWS S3 | AWS SES | AWS SES | PIL | FFMPEG | Nginx | Bash | Pdftkit | wkhtmltopdf

- Wrote the Buyer module APIs i.e. authentication, Cart and wishlist management.
- Wrote order and review management module.
- Developed product inventory module which includes Product CRUD, Product media uploads and scaling.
- Developed deployment script and Cron Jobs for auto backup.
- Generated pdf invoice with pdftkit.
- Instamojo payment gateway integration

EDUCATION

2014 - 2016

Master Computer Application at Vellore Institute of Technology, Vellore

2010 - 2013

Bachelor Computer Applications at Mohan Lal Sukhadia University, Udaipur
